Director's Letter

Dear Heroes, Villains, and Future Friends,

Mirror, mirror on the wall, welcome to the most exciting committee of them all! Welcome to the Fictional Joint Crisis Committee at SPAMUN! My name is Juri Matsuda, and I am absolutely over the moon to be your Director this year! On behalf of our entire Dais team, I want to send the biggest, warmest welcome to every single one of you. Whether this is your very first MUN conference or your tenth, our number one goal is to make sure you have a blast, feel supported, and leave with unforgettable memories!

For this iteration, we are throwing you into a fractured Disney universe facing a super unique, modern curse: the weaponization of tech and magic for hostile foreign interference.The rapid expansion of magic mirror networks, realm-spanning communications, and advanced surveillance artifacts has opened dangerous backdoors. From the Pride Lands to Auradon, factions are working from the shadows to hack royal systems, manipulate public opinion, and destabilize sovereign kingdoms.

Because this is a Joint Crisis Committee, you can totally throw dry, boring resolutions out the window! We are going to be locked in a real-time, fast-paced game against your rivals. Every public directive you pass with collaboration, and every private directive you send, will directly shape our story. Don't worry if you're new to crisis, we are right here to help you pull off your wildest, most creative ideas!

We are to move at lightning speed, so remember to just keep swimming and expect the unexpected. We want this to be an incredibly collaborative and fun experience for everyone, so please don't hesitate to reach out if you want to chat about character bios, brainstorm ideas, or just say hi!

Committee Description

The Fictional Joint Crisis Committee (FJCC) offers delegates a new fast-paced and creative perspective to Model United Nations. Through the use of specialized Rules of Procedure, this format encourages delegates to sail beyond rigid debate and adapt to an evolving narrative where their very choices are the moving force of the committee. In this specific committee, delegates will step into the shoes of iconic characters, with the fate of the Disney multiverse put into the hands of both organizations.

Unique from standard single-room setups, FJCC runs two independent but deeply interconnected subcommittees, where debate will be held simultaneously. For this conference, these subcommittees are the Disney Heroes Alliance and the Disney Villains Coalition. Every delegate must actively defend their respective stances, manage their unique magical resources, and cooperate to advance their room's objectives.

While the historical narrative and magical abilities of each character remain true to their original storyline up to where this background guide states, delegates are encouraged not to rely on pre-existing outcomes to predict the results of directives. For instance, even if a villain was successfully overthrown in their original story, their defeat is by no means guaranteed within the conference.

In line with standard crisis committees, this room operates under Crisis Rules of Procedure, where all committee-wide actions must be put forward through directives, and personal communications managed through notes. If you are new to fictional crises or need a refresher on the Rules of Procedure, the staff team is available to answer any questions or clarify procedures ahead of the conference.

Topic Overview

The opening of the Disneyland Gates has plunged the multiverse into an unprecedented crisis. For generations, different Disney realities operated independently, with each universe governed by its own laws of magic and advanced technology. However, the sudden collapse of the central gates separating the universes changed everything, causing the collision of these self-sufficient worlds into a single, overcrowded dimension.

As a result, the balanced reality has begun to fracture under the stress. This collapse has forced characters to take a stance, dividing the multiverse into two feuding blocs: the Disney Heroes Alliance and the Disney Villains Coalition. Both groups now hold the fate of the multiverse in their hands, fighting to determine whether the multiverse can adapt to its changes, or will be completely destroyed.

Faced with the destruction of reality, the inhabitants of the multiverse have fractured into two warring ideological blocs:

- Bloc A, The Disney Villains Coalition: A faction seeking to exploit the chaos, weaponize destabilized magical assets, and reshape the new unified dimension under their control.
- Bloc B: The Disney Heroes Alliance: A faction dedicated to establishing a way to collaboratively manage resources, and finding a method to safely stabilize or reverse the convergence of the two universes.

The fate of the multiverse rests entirely on the resolution of this conflict. Committee debate and directives will dictate whether or not these rival factions are able to navigate different ideologies on managing magical assets to forge a new sustainable reality, or if their warfare will diminish this multiverse's existence.

Historical Analysis

Lion King

The Pride Lands was once a prospering kingdom of the savannah with grasslands, gorges, watering holes, and brimming with life. This land was ruled from the Pride Rock, an outcrop where lions would act as the monarchs of the kingdom. Succession runs by blood, with the birth of each heir celebrated. The kingdom is also built on the belief that past kings watch over their successors as stars in the night sky. Beyond the borders of this realm an elephant graveyard serves as a barren territory inhabited by hyenas in exile. Even further lies an endless desert and jungle, a land in which no law of any kind is applied.

Initially King Mufasa had ruled this peaceful land alongside Queen Sarabi, with Zazu and Rafiki. Their son Simba was born and given the right to the throne as heir. However Mufasa's younger brother Scar sat restlessly as his claim to the throne was displaced by being born out of order for the heir. His resentment grew by the day until it boiled to a point.

To satisfy his resentment, Scar drives Simba into the hyenas' territory in an attempt at murder but it subsequently fails as Mufasa, as the king, intervenes. Having failed that coup he proceeds to murder the king by luring him to the edge of a cliff whilst a raging stampede proceeds below. After he gaslights Simba into believing his responsibility and compels him into exile, he ascends to the throne and admits the hyenas into the kingdom, dissolving the previous order that the monarchy has maintained.

The glorious lands begin to fall into drought and the animals within it despair. Meanwhile the exiled Simba meets an unlikely duo, Timon and Pumba, and after a long deliberation and growth he returns to the kingdom to claim his land. After a ferocious battle at Pride Rock, Scar falls from the edge of a cliff, disappears, and is nowhere to be seen after the fire fades.

Big Hero Six

After a devastating earthquake in 1906, San Francisco was rebuilt using Japanese engineering tailored to its seismic coastline. The city of San Fransokyo was born, and became a thriving technological metropolis on the American Pacific coast. Within the heart of the city, San Fransokyo Institute of Technology (SFIT) drives more and more students to pursue their ambitions daily. Hiro Hamada is a fourteen-year-old robotics prodigy who spends his time participating in illegal robot battles despite his

immense potential. He lives with his older brother Tadashi and Aunt Cass, who encourages both brothers to pursue their education and ambitions.[1]

Tadashi eventually convinces Hiro to attend the Institute of Technology and introduces him to his group of friends, including Go Go, Wasabi, Honey Lemon, and Fred. Tadashi also introduces Hiro to Baymax, an inflatable healthcare robot he designed to provide medical assistance to people in need. Inspired by the university's inventions, Hiro develops a collection of miniature robots called microbots that can connect together and move according to the user's thoughts. His invention impresses the university's professor, Robert Callaghan, and Hiro is accepted into the institute after presenting the microbots at a major showcase.[2]

However, shortly after the showcase, a fire breaks out inside the university, and Tadashi returns to the burning building to rescue Professor Callaghan. The building subsequently explodes, killing both Tadashi and Callaghan. Devastated by his brother's death, Hiro withdraws from his friends and refuses to continue his studies. When Baymax discovers one of Hiro's remaining microbots activating on its own, they decide to follow it to an abandoned warehouse, where Hiro discovers that someone had recreated his invention and has put it in mass production. Believing that his brother's death may have been connected to the mysterious figure, Hiro upgrades Baymax with armour and weapons, while his friends create their own superhero equipment.[3]

The group eventually discovers that the masked man controlling the microbots is actually Professor Callaghan, who survived the fire. He had used the microbots to pursue revenge against Alistair Krei, the businessman whose teleportation experiment caused Callaghan's daughter, Abigail, to become trapped in another dimension. After discovering that Callaghan was responsible for Tadashi's death, Hiro attempts to remove Baymax's healthcare programming and orders him to kill Callaghan, but is stopped by his friends. The group later confronts Callaghan as he attempts to destroy Krei's company, but the portal destabilizes and threatens to destroy the city. Baymax sacrifices himself to save Hiro and Abigail, using his rocket fist to propel Hiro back through the portal.

Frozen

The kingdom of Arendelle was a prosperous realm built around a deep fjord, enclosed by towering mountains and dense forests. At its centre stood a grand castle where the royal family governed the kingdom. King Agnarr and Queen Iduna had two daughters, Elsa and Anna. Elsa, the eldest and heir to the throne, was secretly born gifted with the supernatural ability to conjure and manipulate ice and snow. This led to a tragic incident where Elsa accidentally struck Anna with her powers and severely

injured her, leading to the family consulting a colony of trolls for aid. Grand Pabbie healed Anna, but erased her memories of Elsa's magic. Terrified of causing more harm, Elsa withdrew from her sister and those around her, shutting herself away behind the castle doors.

A few years later, after the death of King Agnarr and Queen Iduna, Elsa became the next heir to the throne of Arendelle. At the time of her coronation, the gates of the castle opened for the people of the kingdom and its guests to enter. Anna, elated about the sudden liberty, met Prince Hans from the Southern Isles and fell for him instantly. They decided to get married on the spur of the moment, but when Elsa refused to give her consent to the marriage, Anna got infuriated. This led to a quarrel between the two sisters, making Elsa lose control of her emotions and revealing her powers in front of the whole kingdom.

Intent on bringing her back, Anna found her sister's new ice castle, but Elsa refused to go back because she believed the only way to ensure that she doesn't hurt anyone else is to remain in isolation. This resulted in another heated confrontation, escalation would cause Elsa to strike Anna in the heart, causing the organ to begin freezing. Seeking help from the trolls, it became clear that the only way to save her was an act of true love. Back at Arendelle, Prince Hans unveiled himself and used the situation to further his ambitions. Not only did he leave Anna, but he also locked Elsa in prison.

When Anna had been desperately searching for Elsa, the cold had continued getting worse until Anna's body was almost completely frozen. Elsa eventually ran into Hans outside the castle and he was about to murder her, but Anna noticed him coming toward her and jumped in the way just as Hans was about to attack, and she froze completely in order to save her sister. This broke Elsa's heart, but in the end she realized that the love between the sisters was the key to being able to control her powers. Anna unfroze and came back to life, and the unnatural winter finally loosened its grip from Arendelle. Hans was revealed as the traitor that he was and sent back to the Southern Isles, and Elsa reassumed her role as queen. Elsa had finally learned to control her powers since she wasn't afraid of them anymore, and the gates to the castle opened once more in Arendelle.

Mulan

The Han Dynasty governed an extensive Chinese empire, which had many traditions about the significance of military duties and the family honor. In such a society lived Mulan, the daughter of the Fa family, whose duty was to preserve the family honor by becoming a good wife. This task becomes impossible for her when, on the occasion of her first visit to the matchmaker, the situation gets completely out of control, and she ends up disgracing herself and staining the honor of her family.

Immediately after that, the messengers of the Emperor came to all parts of China to order that one member of each family should enlist in the army of the Empire because the invasion of the empire by the Huns, commanded by the evil-hearted Shan Yu, became inevitable. Mulan's elderly and infirm father being the sole male in her family was obliged to enlist in the army but, unable to bear this death warrant, Mulan secretly replaces him in the conscription papers.

Mulan arrives at the army camp and assumes the identity of "Ping". Under the command of Captain Li Shang, she is forced to use her intelligence and determination to prove her worth, powering through the brutal discipline and physical demands of military training. With the assistance of Mushu, a disgraced family guardian who has secretly followed her, Mulan's wit distinguishes her from others and she became well respected by her fellow soldiers.

When the Huns launch a devastating ambush in the mountains, the Imperial Army is almost completely destroyed. When Mulan notices that Shan Yu is preparing to attack Shang and uses a cannon to trigger an avalanche, burying the Hun army beneath the snow. Although she saves Shang's life and helps defeat the invading force, she suffers from critical wounds that would eventually cost her to reveal her identity.

This betrayal causes Shang to abandon her in the mountains. Yet her discovery of a surviving group of Huns soon proves that the threat has not been eliminated; Shan Yu and his remaining warriors have secretly infiltrated the capital in the chaos of a parade. Mulan rushes to warn Shang and the Emperor, but is hastily dismissed due to her exiled status. Nevertheless, Mulan's continuous insistence convinces them and quickly devises a strategy that would allow soldiers to enter the palace and confront Shan Yu. With the assistance of her companions, she manages to rescue the Emperor and lure Shan Yu onto the palace roof, where she ultimately defeats him by using fireworks to destroy the surrounding palace structure.

With the Hun invasion finally crushed, Mulan is honoured by the Emperor for saving China and protecting the Imperial family. He bows before her and presents her with his crest, while the other leaders of the empire recognize that her courage has accomplished what an entire army could not. Mulan returns home carrying the Emperor's crest and Shan Yu's sword, where her father declares that having her as his child is the greatest honour he could receive.

Hercules

The ancient Greek civilization was built on the strength of gods that inhabited the peak of Mount Olympus and watched over the mortal world from above. The rulers of this kingdom of gods were

Zeus and his wife Hera, who received her son Hercules with the dream that one day he would become a hero. Unfortunately, not everybody was happy about the birth of the baby because Hades, the brother of Zeus and the lord of the Underworld, knew about the prediction that one day Hercules would interfere in his plans to conquer Olympus. Being determined to kill this threat for good before it becomes too strong, Hades decided to send his servants, Pain and Panic, to take Hercules away and deprive him of immortality. Their plot almost succeeded but before drinking the last part of the potion, Hercules was saved. But he became lost from his immortal family and was found by Amphitryon and Alcmene, who brought him up as their own child. Growing up, Hercules turned out to be extremely strong but his talent only separated him from others in society and he felt awkward all the time.

As his strength became harder to control, Hercules struggled to fit into the world around him and began wondering why he was so different from everyone else. Eventually, Amphitryon and Alcmene revealed that Hercules was not their biological son and gave him a medallion bearing the symbol of Zeus. Following the symbol to the Temple of Zeus, Hercules discovered the truth about his origins. Zeus explained that he was a god by birth, but if he wanted to return to Mount Olympus, he would first have to prove himself as a true hero. Hercules then travelled to find Phil. After some hesitation, Hercules eventually convinces the retired trainer to assist him. Through intense training, Hercules learned to control his strength and became a powerful fighter, and refined his skills by defeating monsters and stopping disasters across Greece. His image was placed on merchandise, crowds gathered to see him, and Hercules became known throughout Greece as a legendary hero.

Hades then started to fear that Hercules was getting too powerful and that eventually his fame would start to get in the way of his plans to invade Olympus. In order to do this, Hades used the emotions of Hercules against him. At that moment in time, Hercules meets Megara, or more famously Meg, who had sacrificed her freedom to Hades in order to save the person she loved. Meg originally came to Hercules as a servant of Hades, but once the two got to know each other, she could not carry on deceiving Hercules anymore. Hades saw Meg as Hercules's biggest weakness and he offers her her freedom in return for convincing Hercules to sacrifice his powers for just one day. Hercules agrees because he thinks that he is going to be helping Meg, without realizing that Hades is using his weakness to set the Titans free and take over Olympus. As soon as Hades sets the Titans free, Hercules becomes powerless as they destroy cities, attack the gods and put Greece into a state of chaos. Even without his strength, Hercules will not let Meg down when she is hurt by a fallen column, risking his life to save her. This act of selflessness proved his heroic abilities, and was the key to finally restoring his immortality. With his newfound power, he easily obliterated the Titans and saved Olympus from destruction. However, in its aftermath, Hercules refused the offer of godhood and instead opted to

remain in the mortal world, with his foster family and true love. Returning to Thebes, he was reunited with Meg and finally accepted by the same people who had once rejected him.

Snow White

The royal kingdom was ruled by a vain and wicked Queen who possessed a Magic Mirror that reassured her daily that she was the fairest in all the land. However as the Queen's gentle stepdaughter, Snow While, grew into a beautiful young woman, the mirror changed its verdict, declaring Snow white to be the new fairest of all. Infuriated by jealousy, the Queen ordered her loyal Huntsman to take the young princess deep into the forest and kill her, demanding her heart in a box as proof. Unable to commit the horrific deed, the sympathetic Huntsman urges Snow white to flee into the woods and never look back. Terrified and alone, she ran through the dark forest until she stumbled upon a charming, messy cottage belonging to seven dwarf miners: Doc, Grumpy, Happy, Sleepy, Bashful, Sneezy, and Dopey. After she cleaned their home, the dwarfs warmly welcomed her, and she found a safe haven filled with joy and companionship.

The Queen soon discovered through her Magic Mirror that Snow White was still alive and hiding in the forest. Determined to destroy her rival, the Queen used dark magic to transform herself into an ugly old peddler woman and brewed a poisoned apple designed to put the victim into a death-like sleep. Traveling to the cottage while the dwarfs were away at the mines, the disguised Queen tricked the innocent Snow White into taking a bite of the cursed fruit. As Snow White collapsed, the forest animals alerted the dwarfs, who rushed back and chased the evil Queen to the edge of a rocky cliff, where she fell to her doom. Heartbroken by their loss, the dwarfs could not bear to bury Snow White, so they crafted a coffin of glass and gold to watch over her. Eventually, a Prince who had previously fallen in love with Snow White discovered her in the woods. Awakening her with true love's kiss, the spell was broken, and Snow White rode away with her prince to live happily ever after.

Cinderella

The household of a wealthy widowed gentleman was upended when he remarried a cold woman named Lady Tremaine, who brought along her two cruel daughters, Anastasia and Drizella. Following the sudden death of Cinderella's father, Lady Tremaine's true, tyrannical nature surfaced, and she stripped Cinderella of her inheritance, forcing her to become an overworked servant in her own home. Despite her hardships and the endless abuse from her stepfamily, Cinderella remained kind-hearted,

finding friendship among the household mice, particularly Jaq and Gus. Meanwhile, at the royal palace, the King grew anxious for his son to marry and ordered a grand royal ball, inviting every eligible maiden in the kingdom. Cinderella was ecstatic at the chance to attend, but her cruel stepsisters tore apart her homemade dress right before departure, leaving her weeping in the garden while they left for the palace.

At her lowest point, Cinderella was visited by her Fairy Godmother, who used magic to transform a pumpkin into a carriage, mice into horses, and her tattered rags into a breathtaking gown complete with delicate glass slippers. She warned Cinderella that the spell would break at the stroke of midnight. At the ball, the Prince was instantly captivated by Cinderella, and the two danced the night away, completely unaware of her identity. When the clock began to strike midnight, Cinderella fled the palace in a rush, accidentally leaving behind one of her glass slippers. The Prince vowed to marry whoever fit the slipper, prompting a kingdom-wide search led by the Grand Duke. Lady Tremaine locked Cinderella in the attic to prevent her from trying it on, but Jaq and Gus courageously stole the key to free her. Just as the Duke was about to leave, Cinderella stepped forward, produced the matching slipper, and married the Prince, escaping her stepfamily's cruelty forever.

Sleeping Beauty

The kingdom of King Stefan and Queen Leah celebrated the long-awaited birth of their beautiful daughter, Princess Aurora, inviting royals and magical beings to a grand christening. Three good fairies, Flora, Fauna, and Merryweather, bestowed gifts of beauty and song upon the infant princess. However, the joyful celebration was shattered by the arrival of Maleficent, a powerful and wicked fairy who was furious at being excluded. She cursed the baby, declaring that before the sun sets on her sixteenth birthday, Aurora would prick her finger on the spindle of a spinning wheel and die. Merryweather managed to soften the curse, altering it so that Aurora would not die, but instead fall into a deep sleep that could only be broken by true love's kiss. To protect her, the King ordered all spinning wheels burned, and the three fairies disguised themselves as peasant women, raising Aurora in a hidden cottage in the woods under the alias Briar Rose.

On her sixteenth birthday, Aurora met a handsome stranger in the woods, unaware that he was Prince Phillip, the very man she had been betrothed to since infancy, and the two instantly fell in love. That same evening, the fairies revealed her true royal identity and returned her to the palace, leaving Aurora devastated over the romance she thought she had to abandon. Capitalizing on her sorrow, Maleficent lured Aurora into a secluded tower, forcing her to touch a glowing spindle and fulfilling the prophecy. To secure her victory, Maleficent captured Prince Phillip and locked him in her dungeon to prevent him from breaking the spell. Armed with the Shield of Virtue and the Sword of Truth provided by the

three good fairies, Phillip escaped and battled Maleficent, who transformed into a massive, fire-breathing dragon. Defeating the beast, Phillip rushed to Aurora's side, woke her with a kiss, and restored joy to the entire kingdom.

Beauty and the Beast

A vibrant French village was home to Belle, a beautiful and intelligent young woman who felt trapped by the provincial minds around her and preferred the world of books to the shallow advances of the arrogant hunter, Gaston. Meanwhile, in a dark, secluded castle, a young prince had been transformed into a hideous Beast by an enchantress as punishment for his cruelty and lack of love. His servants were turned into enchanted household objects, and he was given a magical rose that would bloom until his twenty-first year; if he could not learn to love another and earn her love in return before the last petal fell, he would remain a beast forever. When Belle's eccentric inventor father, Maurice, got lost in the woods and was imprisoned by the furious Beast, Belle tracked him down and selflessly offered to take her father's place as a permanent prisoner in exchange for his freedom.

Initially, life in the castle was tense, as the Beast's volatile temper terrified Belle, but the hospitable servants, including Lumiere the candelabra and Cogsworth the clock comforted her with a spectacular dinner. Over time, the Beast showed flashes of gentleness, saving Belle from a pack of wolves, and the two began to find common ground, developing a deep, unexpected bond. However, when the Beast used his magic mirror to show Belle that her father was dying in the woods, he chose to set her free out of love, believing his chance to break the curse was lost forever. Belle returned home, but Gaston discovered the Beast's existence and whipped the villagers into a fearful mob to storm the castle and kill him. During the chaotic battle, Gaston mortally wounded the Beast on the castle roof before falling to his own death. As the Beast lay dying, Belle wept and confessed her love just as the final rose petal fell, triggering a magical transformation that restored the prince and his servants to their human forms.
